

J8S-UP Underpad Machine

Our underpad machine offers versatility for many different product sizes and folding capabilities, depending on your preferences. This adaptability, combined with the speed of a Joa machine, will provide value for years to come. Some machine highlights include:

- **Size capabilities** – Machine can run multiple widths and lengths with minimal parts changes.
- **Multiple core availabilities** – Ability to make products with fluff or air-laid cores.
- **Folding options** – The machine can fold the product based upon your packaging preferences.
